

HPM Design Centers

Years in Business: 123

HPM'S DESIGN CENTERS ARE HAWAII'S PREMIER DESTINATIONS FOR HOME DESIGN, from cabinets and countertops to appliances and flooring. For new homes or ADUs, choose from over 20 models, including material packages. HPM's specialists are experts in guiding your product selection to fit your family's budget, style and needs.

Top Three Design Tips:

1. Balance function and aesthetics in your kitchen design by exploring all available options. HPM's designers can assist with key decisions.
2. Consult an appliance specialist who can match solutions to your lifestyle, including aging-in-place considerations like swing-door appliances for accessibility.
3. Don't overlook lighting — both fixture style and bulb temperature can dramatically impact the appearance of your cabinets and countertops.

Top Three Trends:

1. Create a stunning modern kitchen with light, organic tones instead of grey. Add drama with rich accent colors like emerald or black.
2. For a truly spectacular element, consider backlit countertops or backsplashes that create an enchanting ambience.
3. Achieve a sleek, minimalist aesthetic with panel-ready appliances that blend seamlessly into your cabinetry for a cohesive look.
